

# HAIR GROWTH WITH ANTEAGE MD®

BONE MARROW STEM CELL  
TECHNOLOGY+ FOLLICLE  
REGENERATION

**AnteAGE MD®**  
Growth Factors & Cytokines

**AnteAGE is a pioneer in harnessing the power of bone marrow stem cells for aesthetic purposes.** Our hair products in particular have been formulated with specific stem cell derived growth factors that have been influenced to retrain follicle health patterns and restart the growth (“anagen”) phase of hair cycles. Without the addition of these growth factors, periods of growth get shorter as you age and symptoms such as hair loss and thinning begin to show.

These specialized proteins reverse hair loss by targeting the Wnt cell signaling pathway, a system well known in cell biology to enable cell communication and gene transcription (both requirements for cell duplication and health). When this line of cell communication is activated, a regenerating effect can be seen as hair follicles grow larger in size and number, hacking your hair growth cycle back on track.

Just because nature has slowed down doesn't mean you can't have a full head of hair. Take control and give your hair the boost it needs to get growing again.
